

JOB DESCRIPTION

Job Title: Field Research Supervisor (6 positions)

Location: Nairobi, Mombasa, Kitui, Kilifi

Reports to: Research Associate

Deadline: 9th January 2026

Duration: 2 months

Job Purpose:

Maarifa Research Center is a Kenya-based research and data solutions organization founded in 2020. We specialize in research, monitoring and evaluation, and evidence-based program implementation across multiple sectors, supporting policy advisory and social development initiatives in Kenya. Maarifa leverages advanced data collection and analysis techniques, including artificial intelligence, to deliver rigorous research and high-quality, locally grounded insights.

The project aims to collect information on AI-enabled career counselling and the employment outcomes for young people in Kenya. The research also explores how AI-human collaboration impacts decision quality and productivity.

Position: Under the general supervision of the Research Associate, the Field Research Supervisor will primarily be responsible for managing a team and collecting high-quality data in the field. Below is a list of some of the Field Research Supervisor ' general duties and responsibilities.

Key Responsibilities:

- Administer surveys using SurveyCTO.
- Diligent completion of checklists and other means of monitoring data collection.
- Providing feedback during debriefs on data collection activities and survey instruments that will inform improvements in project operations.
- Ensure data integrity is always maintained and minimize errors in survey administration.
- Manage a team of field officers and ensure they meet survey targets
- Other duties related to project implementation and administrative tasks as needed.

Qualifications, Skills, and Experience:

- Bachelor's degree or Diploma in social sciences, public policy, or related fields.
- Mandatory prior experience in data collection using SurveyCTO or other electronic data collection systems.
- Experience conducting in person data collection surveys.
- Experience managing a team conducting data collection surveys.
- Excellent verbal communication skills with fluency in the local languages.
- Excellent interpersonal, planning, detail-oriented and organizational skills.
- Flexible, self-motivated, able to manage multiple tasks efficiently, and a team player.

Application Process

Interested candidates can apply for the position via this [link](#). Only shortlisted candidates will be contacted for further steps in the selection process.

Fraud Warning: Maarifa Research Center does not charge recruitment fees. Any request for payment is fraudulent.
